ELSEVIER

European Journal of Operational Research 113 (1999) 700–702

EUROPEAN JOURNAL OF OPERATIONAL RESEARCH

Contents Volume 113

1 Brand positioning under lexicographic choice rules
J. Bhadury and H.A. Eiselt

17 Multi-resource investment strategies: Operational hedging under demand uncertainty
J.M. Harrison and J.A. Van Mieghem

30 Can-order policies for coordinated inventory replenishment with Erlang distributed times between ordering
H. Schultz and S.G. Johansen

42 Some stochastic inventory models with deterministic variable lead time
M. Hariga and M. Ben-Daya

52 An (s,S) random lifetime inventory model with a positive lead time
L. Liu and T. Yang

64 Stepwise decomposition approaches for large scale cell formation problems
J.-S. Chen and S.S. Heragu

80 A branch and bound based heuristic for multi-product resource constrained scheduling problem in FMS environment
K. Shanker and B.K. Modi

91 On the minimization of total weighted flow time with identical and uniform parallel machines
M. Azizoglu and O. Kirca

101 Stochastically minimizing total flowtime in flowshops with no waiting space
A. Allahverdi

113 Heuristics for scheduling in a flow shop with multiple processors
S.A. Brah and L.L. Loo

123 Some new results on simulated annealing applied to the job shop scheduling problem
M. Kolonko

137 A new approach for solving repair limit problems
J.S. Dagpunar

147 Analysis of centroid aggregation for the Euclidean distance p-median problem
P. Zhao and R. Batta

169 Simulation optimization with qualitative variables and structural model changes: A genetic algorithm approach
F. Azadivar and G. Tompkins

183 Determination of the optimal externality: Efficiency versus equity
C. Romero

193 Cooperative games with stochastic payoffs
J. Suijs, P. Borm, A. De Waegenaere and S. Tijs

206 Estimating returns to scale using non-parametric deterministic technologies: A new method based on goodness-of-fit
K. Kerstens and P. Vanden Eeckaut

215 On a 2-dimensional equipartition problem
F. Conti, F. Malucelli, S. Nicoloso and B. Simeone

231 OR Software
H. Thiriez

235 Editorial
Y. Siskos
236 Intelligent multicriteria decision support: Overview and perspectives
Y. Siskos and A. Spyridakos
247 Facilitators, decision makers, D.I.Y. users: Is intelligent multicriteria decision support for all feasible or desirable?
V. Belton and J. Hodgkin
261 A DSS for multiple criteria decision analysis with imprecisely specified trade-offs
V.V. Podinovski
271 Solving multiple criteria choice problems by interactive trichotomy segmentation
A. Jaszkiewicz and A.B. Ferhat
281 Using artificial intelligence and visual techniques into preference disaggregation analysis: The MIIDAS system
Y. Siskos, A. Spyridakos and D. Yannacopoulos
300 The 'Light Beam Search' approach – an overview of methodology and applications
A. Jaszkiewicz and R. Słowiński
315 Decision Support Systems in action: Integrated application in a multicriteria decision aid process
C.A. Bana e Costa, L. Ensslin, E.C. Corrêa and J.-C. Vansnick
336 MARKEX: An intelligent decision support system for product development decisions
N.F. Matsatsinis and Y. Siskos
355 Interactive multicriteria procedure exploiting a knowledge-based module to select electricity production alternatives: The CASTART system
X. Gandibleux
374 Multi-objective modeling for engineering applications: DIDASN++ system
A.P. Wierzbicki and J. Granat
390 Deterministic job-shop scheduling: Past, present and future
A.S. Jain and S. Meeran
435 A bicriteria approach to the two-machine flow shop scheduling problem
S. Sayın and S. Karabatı
450 Sequencing and due-date determination in the stochastic single machine problem with earliness and tardiness costs
H.M. Soroush
469 Guided local search and its application to the traveling salesman problem
C. Voudouris and E. Tsang

501 Social theory and system dynamics practice
D.C. Lane
528 A heuristic algorithm for the symmetric and asymmetric vehicle routing problems with backhauls
P. Toth and D. Vigo
544 An exact algorithm for the capacitated facility location problems with single sourcing
K. Holmberg, M. Rönnqvist and D. Yuan
560 Ranking of generalised multi-stage KANBAN policies
S. Axsäter and K. Rosling
568 Lot sizing with quality improvement and setup time reduction
J. Vörös
575 Scheduling of design projects with uncertain number of iterations
P.B. Luh, F. Liu and B. Moser
593 Optimal fuzzy counterparts of scheduling rules
E.C. Özelkan and L. Duckstein
610 Optimal control for an $M^X/G/1$ queue with two service modes
R.D. Nobel and H.C. Tijms
620 Approximation method for M/PH/1 retrial queues with phase type inter-retrial times
J.E. Diamond and A.S. Alfa
632 Adapting the Warmack–Gonzalez algorithm to handle discrete data
P.A. Rubin

643 Evaluation and refinement of aspiration-based methods in MCDM
T.J. Stewart
653 Regular packing of congruent polygons on the rectangular sheet
Y.G. Stoyan and A.V. Pankratov
676 O(n log n) procedures for tightening cover inequalities
L.F. Escudero, A. Garín and G. Pérez
688 Intervening duality and bargaining with a farmer–landowner example
M.J. Ryan
700 Contents Volume 113
